| Contributed to the development of responsive full-stack web applications and AI/ML solutions by implementing scalable features, optimizing application performance, and supporting data-driven automation and predictive analytics in collaborative development projects. | |

PROJECTS

- **Accommodation & Meal Booking Platform** | [GitHub](#)
Built a full-stack web platform that addresses the challenge of finding trusted accommodation and affordable meal services by connecting students and working professionals with verified PGs, rental rooms, hostels, and tiffin providers. Implemented secure authentication, dynamic listings, advanced search and filtering, booking management, and a responsive user interface.
- **Customer Behavior Analytics Platform** | [GitHub](#)
Designed an AI-powered customer analytics platform to predict satisfaction levels, identify customer segments, and generate business insights using machine learning, along with an interactive dashboard that helps organizations to optimize & improve customer retention, and make smarter data-driven decisions.

Extra-Curricular

- **NSS & UBA Member** – Participated in community service and rural development initiatives.
- **University Handball Player (RTMNU)** – Represented RTMNU in inter-university handball tournaments.
- **Event Coordinator, Trade Wars 2.0 (SVP CET)** – Managed event coordination and team activities.
